

We are writing to let you know of an update coming to MyChart regarding how the results of lab test are released to your/your child's MyChart account.

Previously, lab results were not released to MyChart until 2 days after the ordering provider received the results. This gave the ordering provider time to review results before discussing them with you. As of November 11, lab results will be released immediately to My Chart.

Many lab results that you may see marked as Abnormal in My Chart, fall just outside of the Normal range. ***The great majority of these results, although marked as Abnormal, have no clinical significance, and are not cause for worry.***

Please know that all labs are reviewed the same day they are received by a Doctor or Nurse Practitioner, and we will always contact you in a timely manner with any labs that need immediate action.

Often a group of labs are ordered, and results may come back on different days depending if a particular test is run locally or sent-out to another specialty lab. The ordering doctor will often wait until all labs come back before discussing them with you. Again, please know, anything of urgent concern will be taken care of that same day.

Please know our office closely monitors all lab results, yet we also want you to know you can always contact the office to discuss any concerns you may have.

We appreciate the trust you put in us to partner with you in raising happy and healthy children!
